

She was born in the Czech Republic, where she got the diploma at the Prague Lyceum.

The art of Sarka can be framed in the sphere of visual arts. Soon, her natural and inherited predisposition evolves to an independent maturity of her artistic expressivity, in a new environment, influenced by her private situation as well as by the creation of her own family.

Her works with their resonance, assure us that the eternal human desire of harmony, beauty and lyricism is still alive and is still able to fill us with happiness in everyday life.
